*****1001 Wines, You must try before you die, Neil Beckett (General Editor), published by Ebury Press (according to vintage)**

Indication for wines, which are made according to the biodynamic principles, introduced by the Austrian philosopher Rudolph Steiner in 1924. The basics of this concept encompass the sustainable agriculture and organic principles, not to use any chemical sprays and fertilizers when grapes are grown.

The timing of applications and other vine management procedures are based on the cycle of the sun, moon, stars and planets.
